

Soham Khot

+91 9901341404 - sohamkhot75@gmail.com - linkedin.com/in/sohamkhot75 - github.com/spkhot

OBJECTIVE

- Motivated and disciplined individual with a passion for technology, problem-solving, and continuous learning. Focused on building practical solutions while growing as a software developer.

TECHNICAL SKILLS

Programming Languages : C++ (Data Structure and Algorithms), Python, SQL

Backend & Frameworks : Node.js, Express.js, RESTful APIs

Databases : MySQL, MongoDB

Tools & Platforms : Git, GitHub, Postman, SQL Server Management Studio (SSMS)

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

AI Productivity Tools: ChatGPT, Google Gemini, Claude AI

EDUCATION

Sharad Institute of Technology College of Engineering

B.Tech in Electronics Computer Engineering

K.L.E College G.I. Bagewadi Arts, Science Commerce College

PUC in Science

Yadav, Maharashtra

December 2022 - July 2026

Nippani, Karnataka

July 2020 - March 2022

WORK EXPERIENCE (STARTUP)

Software Developer

TechFusion

August 2025

- Design, develop, and maintain web applications and software solutions for clients across education sectors.
- Develop and deploy server-side applications ensuring scalability, security, and high performance.
- Collaborate with cross-functional teams to gather requirements and deliver customized software solutions.
- Implement best coding practices and perform debugging, testing, and version control (Git) to ensure quality.

PROJECTS

- **FoodConnect :** Built a full-stack social media platform for food creators and businesses to upload videos, explore reels, and manage profiles with secure authentication and authorization. (MongoDB, Express.js, React.js, Node.js, Authentication, Authorization, REST APIs).
- **TapType :** Implemented low-level keyboard event handling in C++ using the Win32 API to capture and process key-press duration in real time. Developed logic for automatic case switching and optimized input processing for faster and more efficient typing.
(C++, Win32 API, Windows System Programming, Keyboard Hooking, System Tray Applications, Google Analytics Integration, Inno Setup Packaging)
- **Football Player Analytics Database System :** Football Player Analytics System : Designed a normalized football analytics database with 9 interconnected tables to manage player, club, award, and transfer data. Developed SQL queries for performance analysis, statistics tracking, and data insights using relational database concepts. (SQL Server, SSMS, SQL, Database Design, Normalization)

ACHIEVEMENTS & LEADERSHIP

- Established and led a tech team delivering custom websites and full-stack solutions for clients, focusing on innovation and real-world impact. [Link](#)
- Completed Postman API Fundamentals Student Expert certification through Postman Academy.
- Secured 2nd Prize at "Adivtya '23" National-Level Student Tech Fest.
- Built a functional solution during PHN Hackathon 2024 under strict time constraints.
- Solved 300+ LeetCode problems, strengthening problem-solving and algorithmic thinking skills. [LeetCode](#)
